

**CS 372**                      **Introduction to Computer Networks**  
**Self-Check Exercises: Lecture 2**

- 1) What does a protocol do?
- 2) What are some human protocols?
- 3) What devices reside on the network *edge*?
- 4) What devices reside in the network *core*?
- 5) What is the difference between the client/server model and the Peer-to-Peer (P2P) model?
- 6) What are some components of the TCP protocol?
- 7) What are some components of the UDP protocol?
