CS 372   **Introduction to Computer Networks**
Self-Check Exercises: Lecture 40

1) With regard to wireless mobility, please describe each of the following terms.
   a. Home Network:

   b. Home Agent:

   c. Permanent Address:

   d. Visited Network:

   e. Foreign Agent:

   f. Care-of Address:

   g. Correspondent:

2) Why is "letting the routers handle it" not feasible for mobility?

3) In _____ routing, the correspondent sends all packets to the home network, which then redirects them to the mobile device's visited network.

4) In _____ routing, the correspondent contacts the home agent to get the mobile device's care-of address, and sends packets to the visited network.

5) What are some of the performance issues involved with mobility?
